PHP · Symfony · Laravel
CQRS · Hexagonal architecture
Doctrine · PHPUnit · REST APIs

Front-end & product

Vue 3 · React · TypeScript
PostgreSQL · MySQL
Agile / Scrum · Code review

Integrations & tools

HubSpot · Karrio · Factur-X
Messenger · RabbitMQ · Docker
Git · GitLab CI/CD · Webhooks

PROFESSIONAL EXPERIENCE

decqPrint (formerly Yoo)

Sep. 2023 - Present

PHP / Symfony Developer

- Developing ERP features for orders and production; contributing to the transition to SaaS, CQRS and hexagonal architecture.
- Independently delivered HubSpot CRM, Factur-X and business-identifier validation integrations; designed and built a WYSIWYG label editor.
- Contributing to quotations, carriers and raw-material purchasing with consumption estimates; developing Vue.js features and PHPUnit tests.

Tech Lead - May to Oct. 2024 assignment

Led 3 developers, planned sprints and coordinated priorities with the Product Owner.

HiIT Co

Aug. 2022 - Aug. 2023

PHP / Symfony Developer

- Built and maintained Symfony applications, including an ERP and the redesign of a real-estate project-tracking application.
- Developed custom WordPress plugins and third-party API integrations; worked with MySQL and PostgreSQL and optimised application performance.

NEURONET

Jun. 2018 - May 2022

Web Developer

- Built websites, e-commerce platforms and a registration-management application.
- Developed with PHP, Symfony and Laravel; delivered custom plugins and maintained and optimised MySQL applications.

sitedyali / Web Developer

Jan. 2016 - Jan. 2017

Built a CMS and redesigned websites; developed PHP / Laravel applications and managed MySQL databases.

SELECTED PROJECTS

Software for the work behind the business.

01 PxlOps

Industrial ERP / SaaS - decqPrint

ERP for personalised-product manufacturers, covering sales management, production, shipping, after-sales support and accounting. Independent feature ownership and team contributions to the product's evolution into SaaS.

CONTRIBUTION & OUTCOME

HubSpot: independently built an ERP plugin synchronising customers, quotes and after-sales tickets, including statuses and updates. The sales team enters customer and quote data in one tool.

02 StockManager

www.stockmanager.cloud

Co-founder - built from scratch

Management application designed for Moroccan wholesalers. Co-founded the product and built the application from scratch around inventory, sales, purchases and payments.

03 Milkiya

www.milkiya.ma/fr_fr

ERP & real-estate portal

Contributed to a real-estate ERP and its associated website, enabling agents to list and manage the properties they market and publish their listings.

04 FBA Flip

fbaflip.io

Marketplace - US client

Built a marketplace from scratch for a US client, connecting business buyers and sellers through a dedicated platform.

EDUCATION

Master's Degree - Big Data & Artificial Intelligence
